10FT STRAIGHT TENSION FABRIC BANNER

Banner File Setup & Requirements

PCW10F

FILE REQUIREMENTS

***Final print size* - 117.32" X 90.16"**

***Artwork plus additional bleed area* - 117.32" X 90.16"**

- RGB preferred (or CMYK)
- Images @100 dpi resolution
- Files to be provided as EPS, PDF, TIFF, JPG (zipped/stuffed)
- ***ALL TEXT MUST BE OUTLINED***

Additional Guidelines:

- Each template PDF can be opened in Illustrator or Photoshop, depending on the way you wish to prepare your print file.
- No need to add crop marks as we will set up the final print file.
- Please supply artwork at *Full Size and proportional*.
- Vector documents - EPS files or PDF. All Images in document to be saved at 100 dpi.
- If using complicated effects in Illustrator such as transparencies, compound paths, clipping paths, or gradient meshes, exporting as a JPEG or TIFF file for print use can help ensure the print file looks as intended.

Colors, inluding Pantones, will be matched as closely as possible, but we do not offer full color matching.

We work with our customers to provide the optimal possible outcome. Miniature banner material proofs are available.
